

CAPSULE SORTING SYSTEM

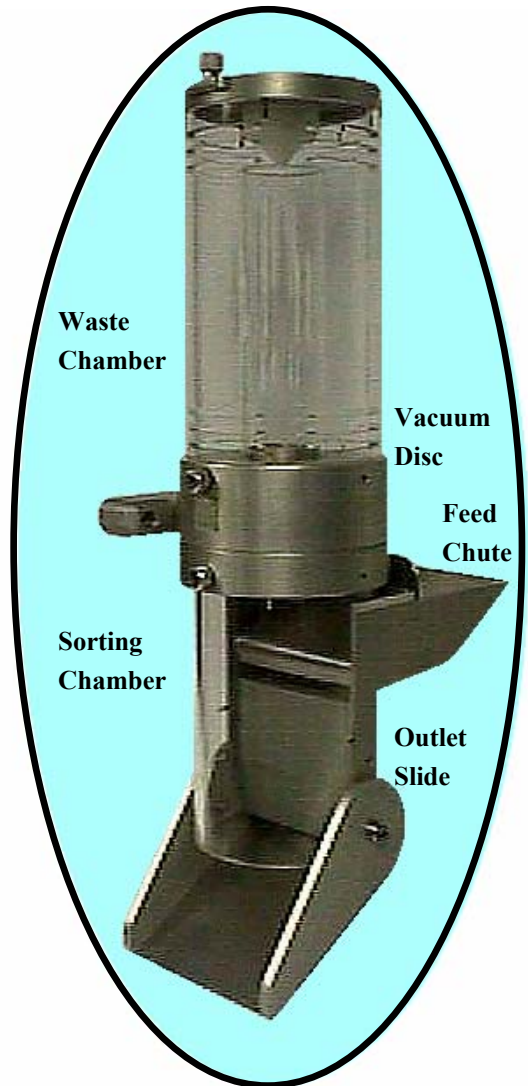

- Prebelli Industries' Capsule Sorting System is a well developed concept that assures capsule integrity by removing empty, destroyed or separated capsules at rates of up to 200,000 per hour.
- The Capsule Sorting System's components and hardware are manufactured from stainless steel, aluminum and cast acrylic. All parts are treated or coated for product contact.
- The Capsule Sorting System (or C.S.S.) is a unit that's versatile in the ability of mounting on various different equipment prior to packaging. The C.S.S. operates from pre - filtered air with the flexibility of regulating and gauging line pressure for specific size capsules.
